

## Classic II Installation Instructions Kawasaki Vulcan 1600 Classic (2003- )

1. Loosen the four button head screws on the chrome fork covers at the top of the fork tubes. See **Figure 1**.

2. Slide the Rifle fork brackets into position under the button head screws as shown in **Figure 1**. Tighten the four screws.

3. Install the windshield by positioning the windshield support brackets onto the outside of the fork brackets. Use two ¼-20 x ½" socket head cap screws and ¼" washers, on each side to attach to the fork brackets (included).

**Note:** With four mount holes in each fork bracket and long slots in the windshield support brackets, there is much adjustability for the windshield height and angle.

**For quick removal of the windshield:** Loosen the four button head screws on the side of the forks and remove the windshield by rotating forward and sliding upward.

**Caution:** Retighten the four button head fork screws after removing or installing the windshield.

## MAINTENANCE

**WINDSHIELD CLEANING** - Use mild soap and water or glass cleaners like Windex and a soft cloth. Do not use solvents or abrasive cleaners. Scratches can usually be removed with plastic polish or automotive cleaner waxes.

**FORK CLAMPS** - The aluminum fork clamps can be polished with a recognized polish like Semichrome or any brand name mag cleaner where the label lists it being for aluminum.

**SNAP CAPS** - To remove a Snap cap, lift an edge with a fingernail and carefully slide a small screwdriver blade under the cap. Gently pry off. To install, press on until cap snaps in place.

**CAUTION:**

Never allow brake fluid to come in contact with the windshield.

**WARNING:**

Tinted windshields are not for nighttime use unless you look over the windshield in the normal riding position.
