

## Classic Installation Instructions Honda VTX 1300 (2003- )

1. Remove the two short 8mm screws with 12mm hex heads holding the chrome plated wire cable guides attached to the bottom of the upper triple clamp. Store away the cable guides- they will not be reused.
2. Remove the two 8mm bolts with 12mm hex heads and nuts that mount the headlight and turn signal brackets to the lower triple clamp.
3. Slide the windshield fork mounting brackets into position. The larger bottom bent tabs slide into place sandwiched between the headlight and turn signal brackets on the lower triple clamp. Keep all cables in front of the Rifle brackets. Fasten with the 8mm bolts and nuts.
4. The upper bent tabs of the windshield fork brackets are fastened to the bottom of the upper triple clamp with the short 8mm screws.
5. Hold the windshield up to the fork brackets with the windshield supports on the outside of the fork brackets. Loosely secure the windshield with the supplied ¼"-20 socket head cap screws and flat washers. Note that there are three mounting nutserts on each fork bracket. Choose two adjacent nutserts to mount the windshield at your desired height and angle.
6. Tighten all mounting screws.

**Note:** There are three mounting holes on each bracket, use only two. Pick the two that will put the windshield at the height you want.

## MAINTENANCE

**WINDSHIELD CLEANING** - Use mild soap and water or glass cleaners like Windex and a soft cloth. Do not use solvents or abrasive cleaners. Scratches can usually be removed with plastic polish or automotive cleaner waxes.

**FORK CLAMPS** - The aluminum fork clamps can be polished with a recognized polish like Semichrome or any brand name mag cleaner where the label lists it being for aluminum.

**SNAP CAPS** - To remove a Snap cap, lift an edge with a fingernail and carefully slide a small screwdriver blade under the cap. Gently pry off. To install, press on until cap snaps in place.

**CAUTION:**

Never allow brake fluid to come in contact with the windshield.

**WARNING:**

Tinted windshields are not for nighttime use unless you look over the windshield in the normal riding position.
